1. This regulation adopts by reference the most recent references to the *Annual Statement Instructions, Accounting Practices and Procedures Manual* and the *Financial Condition Examiners Handbook* of National Association of Insurance Commissioners ("NAIC"). The regulation requires that insurers file on an annual basis (1) an annual audit of financial statements reporting the financial position and the results of operations of insurers by independent certified public accountants, (2) Communication of Internal Control Related Matters Noted in an Audit, and (3) Management's Report of Internal Control over Financial Reporting.

Pursuant to the requirement of K.S.A. 77-416(b) the Kansas Insurance Department submits the following description of the economic impact of the above referenced proposed regulation K.A.R. 40-1-48:

1. This regulation adopts by reference the most recent version of National Association of Insurance Commissioners ("NAIC") health risk-based capital reports, including overview and instructions, for companies. Risk based capital is a method of measuring the minimum amount of capital appropriate for an insurance entity to support its overall business operation in consideration of its size and risk profile. Risk based capital standards for health organizations were enacted in Kansas in the year 2000 and have been amended. This regulation sets out the requirements and format of the risk-based capital report that all domestic health organizations are required to file each year.

3. The economic impact will be positive, if any, because the reports that are required to be filed in Kansas are uniform formats as established by the NAIC. There will be little or no economic impact on the Kansas Insurance Department, consumers, small businesses, or other governmental agencies.
