**K.A.R. 100-6-2. Education and Training Requirements.**

This regulation deals with education and training requirements for applicants for licensure in medicine and surgery, osteopathic medicine, and chiropractic.

The proposed regulation has been the subject of communications over several years in regard to the need to update the healing arts regulations and bring them into more consistency with standard practices and educational programs in the industry. The agency consulted with representatives from the University of Kansas School of Medicine, the Kansas Medical Association, and other stakeholders. Further, it should be noted that the Board of Healing Arts is comprised of medical practitioners, business owners, and members of the public. Further, the agency intends to comply with all public hearing requirements involved in the promulgation process. Although the agency does not employ an economist, the lay opinion of the agency staff is that the economic effect on the affected businesses and business sector would be positive. No net implementation and compliance costs are contemplated other than routine agency resources used in regulation promulgation process. (See economic impact statement approved by the Department of Budget).
