**I. Brief description of the proposed rule(s) and regulation(s).**

This regulation sets the open seasons, bag limits, and possession limits for prairie chickens. The proposed version of the regulation would allow hunting of prairie chickens from Sept 15 to January 31.

This is not a federal mandate. Nebraska and Colorado have a prairie chicken season. Oklahoma and Missouri do not. Colorado's season runs October 1 to January 3 and Nebraska's season runs September 1 to January 31.

YES  NO

**Give a detailed statement of the data and methodology used in estimating the above cost estimate.**

Licensure is already required to hunt for prairie chickens. The proposed version of the regulation merely allows for more hunting days and opportunity. Approximately 5,387 prairie chicken hunting permits were sold in 2020 at \$2.50 per permit.

**Prior to the submission or resubmission of the proposed rule(s) and regulation(s), did the agency hold a public hearing if the total implementation and compliance costs exceed \$3.0 million over any two-year period to find that the estimated costs have been accurately determined and are necessary for achieving legislative intent? If applicable, document when the public hearing was held, those in attendance, and any pertinent information from the hearing.**

YES  NO

Prairie chicken hunting is a subset of small game hunting. Small game hunting requires a general hunting license and prairie chicken hunting also requires a prairie chicken hunting permit. Big game hunting requires a permit for the species to be hunted as well as a general hunting license. As a result, the agency cannot determine the economic impact of the sale of hunting licenses specifically used to hunt prairie chickens because of the overlap of pheasant, quail and prairie chicken hunting. However, based on the sales of the prairie chicken hunting permit, if those purchasing the permit solely hunted prairie chickens, the economic impact of prairie chicken hunting
